ABOUT ME

AI/ML-focused Computer Science undergrad skilled in Python, C, and data structures. Experienced in building ML models, automation tools, and end-to-end applications. Looking for hands-on opportunities in software or machine learning engineering.

EDUCATION

PES University | 2024-2028

CHRYSLIS HIGH (CBSE)

CERTIFICATIONS

- Prof CNR Rao. Scholarship
- Python Certification — HackerRank
- C Certification — CodeChef
- LLM: BERT Fine-Tuning (completed)

WORK EXPERIENCE

Technical Head – Aura Club (AI/ML)

Mentored hackathon teams, guiding model development and problem-solving. Authored a technical article on hyperparameter tuning and built ML models using TinyML, TRM, and classical approaches. Conducted ML workshops (Neural Networks, SVMs) for 350+ participants.

Technical Team – Sahaya Club (AI/ML)

PAML-Practical Applications of Machine Learning

Led a team in PAML, building an end-to-end ML project from scratch and pitching it on demo day; drove direction and coordinated development from ideation to execution.

PROJECTS

- Library Management System (Python): OOP-based automation with file handling
- Music Management System (C): Sorting, searching, playlists using data structures
- Tonelink (ML): Influencer-brand matching via NLP & sklearn
- Movie Management System (C): Search & booking with structs and files
- Stock Price Predictor (ML): Trend forecasting with Pandas & sklearn
- AI Debugging Agent: Copilot-style tool for bug reproduction (Docker) & validation
- Gas Leakage Detection (IoT): Real-time sensor-based alert system
- Autoencoders: Deep learning for representation & anomaly detection
- AI Life Simulator: Agent-based decision-making simulation
- Networking: Socket Programming & SDN experiments

SKILLS

- | | | |
|---------------------|----------------------|-------------------------|
| • C/C++, Python | • AI/ML-building and | • Debugging |
| • Javascript, HTML, | deploying models | • Data and ML Libraries |
| WEB DEV | • Developer Tools | |
